

# Mobile EHSQ

Reduce risk, improve compliance, and empower a EHSQ culture

Drive frontline engagement and ownership of environmental, health and safety, and quality (EHSQ) performance with mobile audit, observation and incident management.

## Use Cases

- Hazard, near miss & accident reporting
- Action tracking (CAPAs)
- Automated EHS reporting
- SOPs / safe systems of work
- Dynamic risk assessments
- Energy & sustainability monitoring
- Skill requirements and compliance
- Permit to work audits
- Behaviour-based safety observations
- Audits & CA/PAs

## Benefits

- Faster time to resolution
- Reduced EHSQ incidents
- Re-apply best practices across sites
- Drive sustainability improvements
- On-line Quality checks

## What Results Do Our Customers See?

200%

More Recorded Observations

2-5x

Faster Identified Hazard Resolution

30%

Faster to Onboard and Upskill Workers

>10%

Reduction in EHSQ Incidents

“In terms of performance, we’ve got a safer plant. Previously, prior to digitalization, we were raising on average 15 hazard reports per month with a closure rate of 40%. Now we’re raising over 100 hazard reports per month with a closure rate of over 95%”

**Rob Jones, Plant Manager**

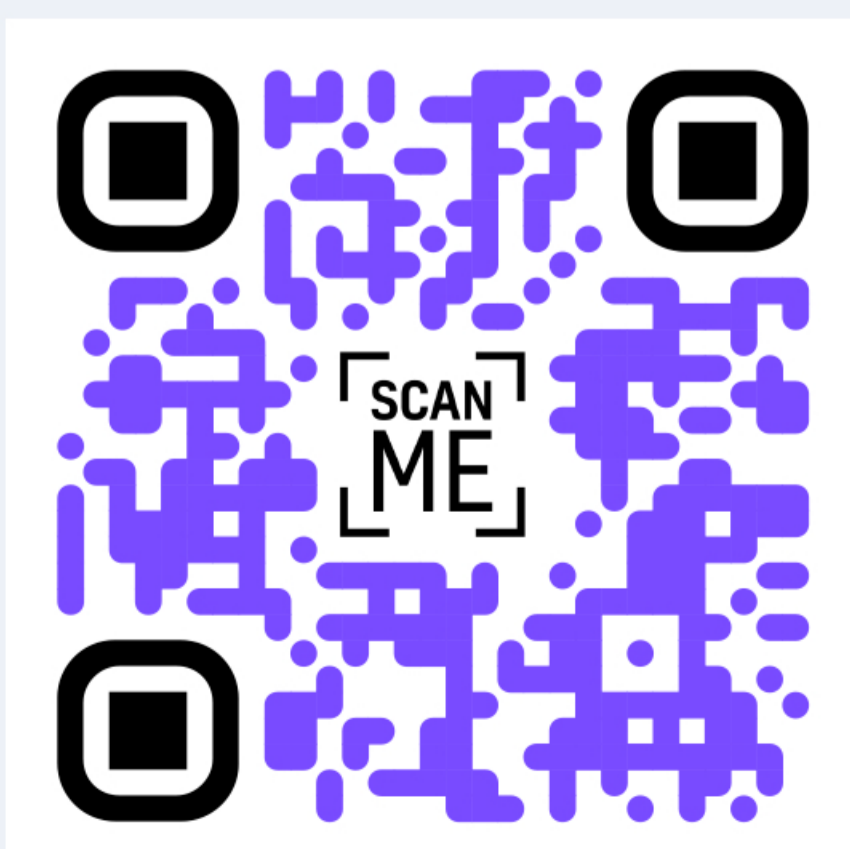

“We are able to monitor the compliance of the execution and it's a key game changer for us because without any effort you are able to get this information. If there is an issue, you get a warning and you can report this and can discuss doing the routines to take the decision very close to the event and close to the operators.”

**Damien Lienhart, Head of E2E Performance**
